

Example Map 1: State Event-Specific Extended Function Network Map

This map illustrates key state agencies that communicate and coordinate with each other when preparing for and responding to public health emergencies, specifically natural disasters, infectious disease events, and mass fatalities.

Example Map 2: Partner Identification Map

This map highlights the key emergency response, state, external partners, and federal partners with which the agency conducting network mapping may communicate or coordinate when preparing for and responding to emergencies.

These maps were created using Mural®. To learn more about PHPR network mapping, please visit the [Region 3 PHPR Center website](#).
